SYLLABUS

General Education Biology (BSC, Section 882361)

(Web-Enhanced Course)

"Nobody is born intelligent: intelligence feeds from strong effort and desire to learn"
-Anonymous

Term: Fall 2015-2

Class location: Room 2207

Class Meeting time: Monday and Friday, 12:00PM – 1:15pm

Professor: Dr. Félix E. Rivera-Mariani

Office Room: 1664

Office Hours: Monday and Fridays 10:00 - 11:00 AM, 2:00 - 4:00 PM or by appointment

Email: friveram@mdc.edu

Phone: TBA

Required Textbook (print or ebook): Reece J., Taylor M., Simon E, and Dickey J. 2012. Campbell Biology: Concepts & Connections. 7th edition. Benjamin Cummings. ISBN 978-

0321696816

Note: there are many options online to rent to the textbook book as well

I. Rational of the course

To introduce students to the main biological concepts that abound in our continuous inquiry to understand life. With the concepts covered, students will have an introductory understanding of molecular biology, genetics, biochemistry, cellular biology, evolution and other topics that help us understand how biosciences explain the interactions between living organisms the environment. In addition, real-life and scientific scenarios will be presented to learn the way biology is scientifically practiced, and how biology affects our daily lives.

II. <u>Learning Objectives:</u> By the end of this course, students will be able to:

- 1. Summarize the scientific method and how it is applied in biosciences
- 2. Illustrate examples of the scientific method in the study of living organisms
- 3. Describe the main characteristics of living organisms
- 4. Differentiate between and organize the different levels of hierarchy of living organisms
- 5. Define and exemplify the laws that apply to energy and matter
- 6. Recognize between atoms, elements, compounds, and molecules
- 7. Recognize the importance of water for living organisms and the ecosystem
- 8. Define and differentiate between carbohydrates, lipids, nucleic acids, and proteins
- 9. Integrate the different roles of biological molecules into living organisms
- 10. List and describe the different sub-cellular organelles
- 11. Integrate the functions of sub-cellular organelles in living organisms
- 12. Describe the mode of transport of ions, compounds, and molecules within cells

- 13. Describe and compare between cellular respiration and photosynthesis
- 14. Summarize and differentiate between the different stages of the cell cycle
- 15. Recognize between DNA replication, transcription, and translation
- 16. Exemplify the transfer of genetic information
- 17. Describe and exemplify the evolutionary theories
- 18. Deconstruct the interactions between the environment and living organisms within the ecosystems

III. Course Materials (Web-Enhanced Course)

- Syllabus, Professor's credentials, Reading assignments, Lectures, Assignment instructions, and Supplemental materials will be available at mdc.blackboard.com.
- Download and install **Reef-Polling**TM, and bookmark https://app.reef-education.com/#/login into your smartphone. Instructions will be provided in class and in Blackboard Learn on how to create an account into **Reef-Polling**TM.

IV. Methods of Instructions

Reading assignments: through a series of online questions to be completed in Blackboard, you will always be exposed to a new topic (e.g. terminology, protocols, interpretation of results) prior to meeting in the class. Each week, a chapter will be assigned, and these online questions are to be completed by 11:59 AM every Monday. These questions will also help you to 1) read with a purpose (preparing for you for class), and 2) engage you in **spaced practice** of your learning (i.e. allowing some forgetting to settle in for learning to be effortful) because we'll be carrying out discussions on the corresponding topics in class as well. **These reading assignments count for a grade (see Grading Scales)**.

In-class group work will facilitate the discussion and peer-teaching of biological terms, processes, scientific data, among others. You'll be grateful for peer-teaching in the classroom.

Student Responses Systems ("clicker"), through the applications Reef-PollingTM, will help the discussion in the class when questions, scientific information, illustrations. It will also provide a tool to determine if you have master the information covered through the course. Through the use of the Reef-PollingTM application in your smartphone, you will be able to answer instantaneously and remotely. More importantly, this approach will allow us to discuss and exchange feedback in real-time in the class.

Written communications provide important information about your learning and how you are organizing knowledge. Formative assessments (i.e. not graded but important for feedback) will be common throughout the course in class, and essential to provide you timely and useful feedback.

Monitoring your learning: I'll be monitoring your learning throughout the course. With the aid of carefully designed cumulative weekly quizzes, your responses in class, and exams, I'll be employing different data analysis (e.g. statistics) approaches to analyze your learning and proficiencies with the learning objectives of the course (see page 1). Don't forget your effort: numbers will tell the story about your effort as well. I'll be sharing with you how learning is performing in the class.

V. Academic Integrity

Each student is expected to maintain a high level of integrity and abide by the procedure 4035 of the 2015-2017 Miami-Dade College Student Rights and Responsibility Handbook. Any work submitted by a student in the course for academic credit will be the student's own work. For the purpose of this course, collaboration is allowed in the following instances: in-class group work, case studies discussions, or when stated by the professor. Nevertheless, each student must submit their individual work unless indicated otherwise by the instructor. Avoid at all costs copying and pasting the information from your classmates' response or from any other sources.

As part of a collaborative and encouraging classroom, you are encouraged to study together and to discuss topics and concepts covered in class with other students. You can obtain "consulting" help from students as well as provide "consulting" help to other students. However, this allowed form of cooperation should never involve one student having possession of a copy of all or part of the work done by another student or someone else, in the form digital files or printed documents.

In the case that copying occur, both the student who copied work from another student and the student who contributed to this behavior will both automatically receive a zero for the corresponding assignment. The penalty for violation of this Code can include failure of the course and/or notifying the corresponding University authorities for disciplinary action.

During exams (i.e. quizzes and exams), you must do your own work. Talking or discussions are not allowed during the examinations. In addition, you cannot compare papers, copy from others, or collaborate in any way. Any form of the behaviors mentioned above will result in failure of the exam and can include notifying the corresponding University authorities for disciplinary action. Cell phones cannot leave the classroom during quizzes and exams, and must be turned off during class unless needed for in-class discussions.

Any form of **plagiarism** will constitute Academic Dishonesty, and points won't be earned during any form of this fault. **Make sure you understand what constitute plagiarism and how to avoid it.**

Any other form of Academic Dishonesty listed in the Miami-Dade College Student Rights and Responsibility Handbook will not be accepted during in the course.

VI. Attendance

Attendance at each class sessions parallels with your learning in the course. The course requires the input of time and effort in order to learn and be proficient in the learning objectives stated earlier in the syllabus. In addition, 30 easy points for good attendance will be provided towards your final grade. For each unexcused absence, unfortunately, I'll have to deduct 1 point, and 0.5 points for each unexcused tardiness. In the event of an absence, the student will be allowed to make up work if the absence results from one of the following:

- A. Official campus activities (as designated by MDC)
- B. Family or personal emergencies (as designated by MDC)
- C. Medical reasons (discussed with the instructor)
- D. Work-related reasons (discuss with the instructor)
- -Make-up exams are allowed <u>only</u> if your excuse meets any of the four requirements above.
- -Make-up for quizzes are not permitted.

-With three unexcused absences, I won't be able to keep you on the class roster.

Late policy

Unless arrangement have been made prior to the due date or have a valid absence excuse (as stated in the Attendance section of this syllabus), I won't be able to award full grade on Late Assignments (the final grade for any late assignment will be 30% less).

VII. Accommodations for students with disabilities

In compliance with the Miami-Dade College and the Student Rights and Responsibility Handbook policy and equal access laws, I more than available to discuss any necessary academic accommodations that may be required for the student with disabilities. Requests for academic accommodations are to be made during the first week of the term, except for unusual circumstances, so arrangements can be made. Students are encouraged to contact the Student Services to verify their eligibility for appropriate accommodations.

VIII. <u>Inclusivity Statement</u>

Members (student, faculty, administrators) of the Miami-Dade College community represent a diversity of backgrounds and perspectives. In this course, and as a member of this community, I am a strong supporter of diversity and its benefits. Therefore, to maintain an adequate learning and diverse environment students in this course are strongly encouraged to:

- A. share their unique beliefs, experiences, and values
- B. be open to the opinions and views of others
- C. honor your colleagues' uniqueness
- D. appreciate the unique opportunity we have to learn from each other
- E. value each other's opinions and communicate in a respectful manner
- F. keep confidential discussions of personal and professional nature
- G. take advantage of this opportunity to share ways in an inclusive environment
- H. must maintain at all times a respectful environment

IX. Grading Scales:

| Item | Points | Grade | Percentage | Points |
|----------------------|--------|-------|--------------|-----------|
| Daily Quizzes | 150 | A | 100 - 90.0% | 360 |
| Attendance | 20 | В | 89.9 - 80.0% | 320 |
| Reading Assignments | 30 | C | 79.9 - 70.0% | 280 |
| 1 st Exam | 100 | D | 69.9 - 60.0% | 240 |
| 2 nd Exam | 100 | F | Below 60.0% | Below 240 |

| Total points | 400 |
|---------------------|-----|
| TT3 (| |

Reef-PollingTM questions (Bonus)

Reading Assignments (30 total points): With the Reading assignments, you will begin to gain new knowledge with each topic. These Reading Assignments will be available in Blackboard Learn (http://mdc.blackboard.com): their deadline will always be Monday's (11:59 AM) unless otherwise stated. Keep in mind that these guide questions won't be available when class time begins. Therefore, due the corresponding reading and complete the guide questions in advanced. Similar to points for attendance, these questions will be 30 easy points towards your final grade.

There is a **0.5 point deduction** if less than 7 out of 10 questions are answered incorrectly, and **1 point deduction** if the Reading Assignment is not completed.

Exams: Three 100 points exams will be administrated during regular laboratory periods. Refer to the syllabus schedule to know the dates of the exams. Each of the exams will be a combination of true/false, multiple choice, fill the blanks, and open-ended questions. No scantrons are needed: questions will be answered on the printed exam provided. **Exams are cumulative.**

Academic Dishonesty regulations, as stated in the MDC student handbook, will have to be strictly enforced. Any violations will lead to a zero on the exam.

There are no make-ups for Exams unless the absence meets the requirements of the Attendance sections of this syllabus.

<u>Quizzes</u>: During the first 20 minutes of each class section, cumulative quizzes will be administered. These quizzes will rehearse your knowledge with effortful learning through openended questions. They will also provide valuable information on how and what you are learning. At the end of the course, the three lowest quizzes will be dropped: quizzes with zero scores will not be dropped. There are no make-up quizzes.

X. Incomplete Grades and Withdrawals

Incomplete (I) grades will be posted only in consultation with the student and professor, and only when extenuating circumstances will prevent the student to complete the requirements of the course. At least one-half of the course must have been completed with a C or better grades. It is important that the incomplete (I) be completed within the timeframe agreed between the student and the professor. Unfortunately, if not completed within the agreed time frame, the incomplete must be submitted as an F.

Withdrawals: The professor is not entitled to withdraw a student from the course: it is the students' duty to evaluate and monitor how he/she is doing in the course. Knowing your status in the course will be important in the case you determine it is necessary to withdraw from the course. The deadline to withdraw (W) from the course **March 16th**, 2016. Keep in mind that a "W" grade will be permanent in your grade transcripts, and constitute an attempt for the course.

XI. Tentative Course Schedule (schedule may change due to unexpected events) (Weekly topics and Quizzes, due dates of Reading Assignments, Exams, among others will also be posted in mdc.blackboard.com)

| Date | Week | Topic | Due Dates for Pre-Lab Reading and |
|-------------------------|-----------|---|--|
| | | | Lab Reports |
| Jan-08 | W1 | -Course introduction -Discussion of syllabus | |
| Jan-11 Jan-15 | W2 | -Introduction to Biology | -Reading Assign. 1 (Ch. 1) -Quiz 1 |
| Jan-18 Jan-22 | W3 | -Holiday (No class) -Chemistry | -Reading Assign. 2 (Ch. 2) -Quiz 2 |
| Jan-26 Jan-29 | W4 | -Biological molecules | -Reading Assign. 3 (Ch. 3) -Quiz 3 |
| Feb-01 Feb-05 | W5 | -Biological molecules -Components of the cell | -Reading Assign. (Ch. 4) -Quiz 4 |
| Feb-8 Feb-12 | <u>W6</u> | -Components of the cell -Exam 1 | |
| Feb-15 Feb-19 | W7 | -Holiday (No class) -Energy, Enzymes, Cell Transport | -Reading Assign. (Ch. 5) |
| Feb-22 Feb-26 | W8 | -Energy, Enzymes, Cell Transport | -Reading Assign. (Ch. 5) -Quiz 5 |
| Feb-29 Mar-04 | W9 | - Energy, Enzymes, Cell Transport | -Quiz 6 |
| Mar-7 Mar-11 | W10 | -Cellular Respiration | -Reading Assign. (Ch. 6) -Quiz 7 |
| Mar-14 Mar-18 | W11 | -Cellular Respiration | -Quiz 8 |
| Mar-21 Mar-25 | W12 | -Photosynthesis | -Reading Assign. (Ch. 7) -Quiz 9 |
| Mar-28 Apr-01 | W13 | -Genetics and Inheritance | -Reading Assign. (Ch. 8) -Quiz 10 |
| Apr-04 Apr-08 | W14 | -Genetics and Inheritance | -Reading Assign. (Ch. 9) -Quiz 11 |
| Apr-11 Apr-15 | W15 | -Biology and Regulation of Genes | -Reading Assign. (Ch. 10-11) -Quiz 12 |
| Apr-18 Apr-22 | W16 | -Biology and Regulation of Genes | |

Apr-25 Apr-29 -Exam 2 (Final Exam)
